Key Contracts and Experience Timeline:

PERSES Ltd (December 2022 – Present) - Role: Health, Safety and Environmental Consultant

Providing occupational health and safety advice, and environmental advice to a broad spectrum of clients, ranging from silversmiths to scrap metal merchants, from demolition works to cater hire, from waste transfer stations to painting and decorators.

My responsibilities include:

- Assist in the development of the demolition specification.
- Carry out a consultation on the tender list.
- Produce the Pre-Construction Information for various clients.
- Produce the Designer Key Hazards for various clients.
- Attend the bid meetings and provide feedback on the contractors submissions.
- Review and comment on the Construction Phase Plans for projects.
- Review and comment on the Risk Assessments and Method Statement and issue a report.
- Carry out the pre-start CDM audit and issue a report.
- Carry out monthly site audits and issue a report on the progress.
- Carry out the completion site audit and issue a report.
- Ensure the completion of the Health & Safety File.
- Consult with clients on NDA (Non-disclosure agreement) decommissioning and demolition projects

Knottingley Solvent Recovery Plant Decommissioning (2022)

- Preparing the RAMS for the decommissioning of the disused solvent recovery plant

Ardersier, Scotland (2021-2024)

- The preparation of site audits and safety reports.

Grangemouth, Scotland (2022-2024)

- Assist in the development of the demolition specification.
- Produce the Pre-Construction Information.

Demolition Management. – January 2008 – April 2020

My responsibilities throughout the demolition management process consisted of the following activities.

- Consistently monitored workmanship of staff for health and safety compliance, safeguarding the integrity of the business and maintaining smooth operations.
- Liaised with multiple contractors during works through to project completion.
- Completed projects on time and within the allocated budget. Worked on multiple projects at any given time always ensuring projects are completed to the highest client expectations.
- Maintained daily communication with vendors and monitored project progress.
- Used company policies to provide effective issue resolution between customers and employees.
- Interpreted blueprints and plans and relayed information to my team of workers ensuring all workers were aware of what was expected.
- Organised and took part in regular on-site meetings with clients and subcontractors.
- Provided excellent leadership skills to maintain steady and productive operations whilst organising Personnel Training and CITB Levies.

- Organised Plant & Equipment on a per-site basis.
- Maintained payroll data and attendance records and delivered them to the job site on time and in good condition.
- Maintained excellent team relationships by helping others during difficult maintenance and repair tasks. Used outstanding technical troubleshooting abilities to identify and resolve system build issues.
- Worked tirelessly to meet production requirements, aiding department performance against delivery targets.

Demolition Supervision. – January 2003 – January 2008

- My responsibilities as a demolition supervisor consisted of the following activities.
- Directed financial aspects of the project by coordinating budget, tracking expenses and documenting variations from the plan.
- Purchased high-quality project materials by sourcing reliable local suppliers.
- Upheld schedule requirements and quality demands with hands-on project supervision.
- Kept production team moving at optimal levels in daily site operations.
- Prevented intrusion, criminal activity, vandalism and injuries to workers with proactive oversight of location safety and security.
- Keeping up to date on the latest safety practices, keeping in compliance with workplace safety regulations.
- Implemented on-site safety protocols and procedures and properly trained all team members on such measures, effectively reducing injuries.
- Collaborated with management, technical crew members and fellow supervisors to organise efficient site operations and achieve demanding schedule targets.
